

# Built-in amplifier type Photoelectric switch

## PFX SERIES

Space-saving with thickness 3.5mm!

Ultra-small size!

5 kinds of sensors are lined-up!

- Thickness is 3.5mm and it is possible to install at the too narrow space.
- Stable lamp (green LED) and output lamp (orange LED) provides and it is easy to see them from the back side and to check when optical axis adjustment.
- Easy to make a wiring because cable from the sensor is tilting.
- High speed response, 0.5msec.
- Water-proof structure, IP67.

### Typical applications

#### Through-beam type

Detection of blocked parts on parts-feeder

It can detect the object with 2mm in diameter stably.

#### Diffuse-reflection type

Position detection of wafer cassette

It is possible to install at the plane position.

#### Limited-reflection type

PCB existing detection

It is possible to install at the narrow.
